

Client Name: _____ Pet Name: _____ Date: ____/____/____

The Canine Tracheobronchitis Assurance Program:

If your dog becomes ill with Tracheobronchitis (Kennel Cough) and Cascade Hospital for Animals has vaccinated your dog within the last 6 months against this disease, we will cover the costs** associated with your dog's treatment.

Eligibility requirements for The Canine Tracheobronchitis Assurance Program:

- Twice a year Tracheobronchitis vaccinations using the Intra-Trac 3 vaccine
- A minimum of one Comprehensive Physical Exam each year, (note: an examination every six months is still our medical recommendation). A Licensed Veterinary Technician can administer the Intra-Trac 3 vaccine if it becomes due within six months of a Comprehensive Physical Exam performed by a Cascade Hospital for Animals veterinarian.

Cascade Hospital for Animals will honor a once a year Tracheobronchitis vaccine administered here or at another animal clinic, but the pet will not be covered by *The Canine Tracheobronchitis Assurance Program*, and the pet owner will be responsible for all costs associated with the treatment of that disease should the pet contract it.

Please indicate below which Tracheobronchitis vaccine option you are directing Cascade Hospital for Animals to follow for your dog(s).

1. I wish to be covered by *The Canine Tracheobronchitis Assurance Program*.

- a. _____(Initials) I would like the twice a year Tracheobronchitis vaccine administered at Cascade Hospital for Animals.

2. I do not wish to be covered by *The Canine Tracheobronchitis Assurance Program*

- a. _____(Initials) I would like only a yearly Tracheobronchitis vaccine administered by my pet's veterinarian***.

**Vaccine must have been administered, and treatment performed by Cascade Hospital for Animals

***The State of Michigan requires that a veterinarian must perform at least an annual examination in order to provide medical services, vaccinations and/or prescriptions.
